

How to: Check TEU ICO Status

Etherscan.io

You may contribute more than once. You can track the total tokens collectable.

Go to <https://etherscan.io/address/teusale.eth#readContract>

The screenshot shows the 'Read Smart Contract' tab selected. The 'Read Contract Information' section is active, displaying a list of contract variables and their values:

- 1. > collectableTokenOf: [Query] (Type: uint256)
- 2. > totalCollectableToken: $\rightarrow 0$ (Type: uint256)
- 3. > owner: $\rightarrow 0x9240d026eba50f85c79c74ef1c192c7e483c72a9$ (Type: address)
- 4. > isCollectTokenStart: $\rightarrow False$ (Type: bool)
- 5. > isAllowContribution: $\rightarrow True$ (Type: bool)
- 6. > saleStart: $\rightarrow 1523498400$ (Type: uint256)
- 7. > saleEnd: $\rightarrow 1526090400$ (Type: uint256)
- 8. > isClientIdentRejectedOf: [Query] (Type: uint8)

Check your Collectable Token

Input your **contribution wallet address** in the section of “collectableTokenOf”. Press “Query”.

Example (1,268 tokens to be collected):

The screenshot shows the 'Read Smart Contract' tab with a query performed. The 'collectableTokenOf' field is populated with the address '0x00350dd247444953186bf1f0aedcd6185eec2ec4'. The response shows the value '12680000000000000000' in Wei.

```
[ collectableTokenOf method Response ]  
  > uint256: 12680000000000000000
```

The value returned is in Wei. Conversion back to Token can be dividing it by 10^{18} . In Excel, assume you copy the value into cell A1, you can calculate ether in another cell by inputting formula “=A1/10^18”.
